Documentation and Support	7	7	4	4	
Average Scores	8.0	7.5	6.4	5.2	

*"(QNX Neutrino) is fast and predictable. We found no issues concerning performance, predictability, or robustness during the tests. The QNX RTOS is also the only RTOS that has a true message-based client-server architecture well equipped to handle today's requirements concerning distributed processing, high availability, etc."*
